

Razdolna School

Dates to Remember

-
- **Sept. 18th:** Early Release - students released @ 12:30 for remainder of day
 - **Sept. 18th:** Migrant Welcome Field Trip (meet at turn-off point by 1:40pm)
 - **Sept. 23rd:** Site Council Meeting @ 4pm
 - **Sept. 24th:** Picture Day
 - **Sept. 27th:** Holy Day (no school)
 - **Oct. 9th:** Holy Day (no school)
 - **Oct. 12th:** Saturday School & End-of-Quarter Day.
 - **Oct. 12th:** End-of-Quarter - students released @ 11:30 for remainder of day

Mrs. Wisharts' Classroom News

What We Are Learning

In **reading**, We are learning about the beginning, middle and end of a book and learning how to give at least one detail about the story.

In **writing**, we are practicing our names in Russian and English as well as letters and numbers.

WOW!! The first few weeks of school has flown by for all of us here in K/1. I have the best K/1 class. All of our students are coming to school excited and ready to learn. I am so excited to see your students each morning and that they are ready to learn.

If you have questions, comments or concerns, please feel free to email me @Twishart@kpbsd.k12.ak.us
Thank you, Mrs. Wishart

What We Are Learning

In **math**, we are learning how many each number represents and how much we have altogether when we combine numbers.

In **science**, we are continuing to learn about plants and animals.

2/3 Grade News!

9-15-19 Mrs. Duncan's Class

Science

We started the year focusing on mammals. We reviewed the categories that define a mammal. Then, we read about mammals, and painted a panda. We also wrote about pandas. We linked science to Art, Reading and Writing. The children loved it! They made some beautiful artwork, and followed the instructions step by step.

Last week, we started a chapter about the human body. We learned about our muscles, and bones.

Reading

Every morning, we have our Reading block. The students are learning new vocabulary, we review and add new spelling words/rules, and read stories. We also have been working on handwriting, and writing. We write in our journals daily. The students are doing their best at completing their work.

Math

Both 2nd and 3rd graders have been working on additions, at their own level. We worked on doubles (8+8), doubles plus one (8+9), we practiced counting on. We are adding 2 digit numbers in 3rd grade, and we will keep going on. During our Calendar time, we focused on multiplications in August, and we are focusing on fractions in September.

Behavior

We have a behavior chart in our class with a reward system. Throughout the day, the children's behaviors are monitored by the adults who intervene in the class: Drasida, Luba, Efimia, or myself. When a child is on task, is kind, and is helping, their pin moves up the chart. When the behavior needs to be fixed, the child gets a warning, and a chance to do better. At the end of the day, I pass out ClassBucks for those who deserve them. At the end of each week, they can redeem them by buying a prize from the prize box or buy some game time, usually Lego time. This has been very efficient so far! It is a pleasure to work with your children.

Mrs. Nichols's 4th-6th Grade Class

Hello! We have had a great month of school so far!

In math, the 5th and 6th graders are continuing to work on finding the volume and surface area of rectangular prisms. The 4th graders are working on multi digit addition and subtraction problems.

In reading we are working on comprehension skills like inferencing and summarizing. We have also started novel groups where students are reading common novels and having great discussions!

In writing, we have been perfecting our paragraph writing skills, and will be working on research essays next quarter.

In science, we are learning about different ecosystems, the non-living and living parts of ecosystems and how humans impact ecosystems.

Classroom Economy: The students earn money for doing their classroom jobs, good behavior and hard work. Every week they must pay rent and utilities and whatever they have left over they can choose to save or spend at the school store.

Mr. Guenther's Math and Science classes.

High school geometry is learning about measuring lines and angles. Their test is coming up in a little over a week.

High school Biology is learning about the properties of life, water and carbon molecules.

Middle school math is learning about working with fractions and the order of operations.

Middle school life science is working on their human organ systems project, which they will be finishing and presenting friday the 20th.

DR. STURM'S HISTORY AND ENGLISH CLASS

UPCOMING EVENTS

- Finishing literature analysis units on survival and the wilderness
 - Building long term shelter
 - Completing 2nd large scale writing assignment
 - Preparing for presentations, and finalizing video production
-
- It will be a fun and busy next two weeks!

See you in the woods!

Efimia Basargin's High school & Middle school Russian Class

This year the Russian class is reading textbooks and writing in workbooks, "Окружающий мир." The books have many unfamiliar Russian words, so they are also working on the vocabulary.

The Middle school students are on Unit "Как устроен мир" "How the world works." They have read chapter "Природа" "Nature" and "Человек" "Person." The class has started a project "Богатства, отданные людям" "Wealth given to people." In addition, the middle school is reviewing the Russian language grammar and rules.

The High school students are on Unit "Наша безопасность" "Our safety." They have read chapter "Огонь, вода и газ" "Fire, water and gas," "Чтобы путь был счастливым" "So the way would be fortunate," "Дорожные знаки" "road signs" and "Опасные места" "Dangerous places." The class has started a project "Кто нас защищает" "Who safeguards us."

The first thing in class, students read a Russian book. It is important for a child to read Russian as much as possible in order to become fluent reader. Encourage your youth to read Russian at home. Here is a website that provides Russian books to read online СкзкиВсем.Ру

Загадка

Она прячется от солнца
Под кустом в глубокой норке,
Бурая - не мишка,
В норке - но не мышка.

**Ответ на загадку:
Картошка**
